

Waste Management

Activity One

In groups, discuss:

- The number of items you can think of in the grocery store that are packaged in plastic, or need plastic bags, note it down.

- Share with each other any litter reducing strategies you use at home

Activity Two

In groups, conduct a research investigation on:

- How the practices of Aboriginal and Torres Strait Islander Peoples support the sustainable use of environments, in particular, how Aboriginal and Torres Strait Islander Peoples stored, transported and collected their food.

- How environments can be used more sustainably (for example agricultural, commercial and recreational practices) and what are some items / products we could use in place of plastics.

Waste Management

Activity Three

In groups, prepare a presentation for your class on your findings from Activity 1 and 2.

- Using your knowledge and research, present ways in which you can reduce your waste and single plastic use day-to-day.
